## ABOUT ME

I am a junior UI/UX Designer and Front-End Developer focused on creating clean user-friendly and responsive digital experiences. I combine strong visual design with practical coding skills to build interfaces that are both attractive and functional .I am Passionate about usability, modern design systems, and delivering smooth , intuitive user journeys

## PROJECTS

Ration Distribution App – UI/UX Case Study

- Designed the delivery and stakeholder flow to support elderly users, people with disabilities, and family members living abroad allowing ration orders to be placed and tracked on their behalf
- Designed a mobile app to help citizens view their ration card details, entitlements, and monthly stock in one place
- Created user flows to simplify how families check eligibility (APL/BPL) and ration balance
- Designed wireframes and high-fidelity UI screens for login home profile and notifications
- Improved information clarity by presenting ration data in card-based layouts
- Added language selection (English & Malayalam) to support regional users
- Designed admin flow for ration shop owners to manage and verify deliveries
- Built an interactive prototype in Figma to demonstrate end-to-end user experience
